- Ingested and processed numerous data types based on Standard Operating Procedures (SOPs)
- Assisted in machine learning model training by providing feedback to machine learning/AI development teams on model performance
- Categorized and analyzed data quality issues
- Organized and maintained data storage according to client account requirements and standards

NYC's Climate Vulnerability, Impact, and Adaptation Analysis (VIA)
New York City, NY

Student Intern — September 2023 - December 2023

- Created digital maps and visualizations using QGIS software for publication on flood exposure and risk in New York City
- Processed spatial data and databases in vector and raster formats for clear visualization in QGIS
- Communicated and collaborated with other scientists and specialists on the task team
- Assessed the quality of 311 data for analysis and visualization usage

NYC's Panel on Climate Change (NPCC) & VIA
New York City, NY

Summer Fellow — June 2023 - August 2023

- Crafted visualizations on flood exposure in NYC for publication in the NPCC's first chapter specifically focused on flooding
- Sorted and cleaned open-source data from NYC OpenData's site for analysis use
- Handled and refined large, detailed, spatial data files through QGIS
- Utilized Python for cleaning, refining, and visualizing rainfall and tide gauge datasets
